FLOHE DC HIGH CURRENT ISOLATOR

THE MODULAR STRUCTURE CORRESPONDS TO THE HIGHEST MECHANICAL AND ELECTRICAL STANDARDS.

Type FRH has a visible isolating distance and regardless of the position, can be vertically or horizontally welded or screwed into the busbar system.

The isolator has incoming and outgoing aluminium contact blocks or copper contact blocks which are provided for welding or screwing to the existing busbar system. An additional wall support is not necessary. The isolator is supported by the busbar package. Shifts to the busbars are compensated in three directions.

A flexible spring adjustment system ensures a secure electrical and mechanical contact and the silver plated main contacts ensure a low voltage drop.

FRH TYPES CAN BE SUPPLIED IN ALL NEEDED VERSIONS

- Manual / motor pneumatic
- Remote drive / emergency drive
- Panic switch function
- Auxiliary switch for internal and external control
- Locking systems: mechanical or electrical
- Terminal box: local / or remote control box
- Temperature monitoring

TECHNICAL DATA

TECHNICAL DATA	Standard units
max. nominal current	400 kA
max. nominal voltage	3000 V
Peak short circuit current	10x nominal current 1 s
Insulation voltage	5000 V DC
max. ambient temperature	60°C
max. temperatur rise	max. ambient temp. +40°C
Operating time ON OFF	motor less 20s / pneumatic less 1s
Traversing in (x/y/z) direction	± 20 mm
mechanical lifespan	5000 operations

FLOHE DC HIGH CURRENT ISOLATOR / DC HIGH CURRENT LOAD BREAKER

THE **FRGL (6-36 kA)** HAS BEEN INCLUDED IN THE RANGE FOR THE TASK OF BI-POLAR MEMBRANE CHLORINE ELECTROLYSIS. IT FEATURES A **PRE-CONTACT** FOR SWITCHING UNDER LOAD (UP TO 750 V DC).

EFRG isolator and FRGL load breaker combinations have been used by industries in many bipolar membrane chlorine electrolysis plants. A control unit with reverse locking is available upon request.

The FRG and FRGL isolators can be supplied for copper designs or aluminium designs. They can be securely supported just by the busbar package and do not require wall support.

Fastening brackets can be supplied on request.

DC HIGH CURRENT ISOLATOR

FRG 6 kA UP TO 120 kA

DC HIGH CURRENT LOAD BREAKER

FRGL 5 kA UP TO 30 kA

THE ENCAPSULATED FRG AND FRGL ISOLATORS ARE A LOGICAL DEVELOPMENT IN VACUUM TECHNOLOGY WITH A CORRESPONDING DISTANCE BETWEEN THE CONTACTS IN ACC. WITH THE VDE + IEC STANDARDS.

The frame is designed for the isolator construction of the vacuum short circuit device. Standard sizes range from 6 kA to 120 kA; larger units are available on request.

The integrated encapsulated main contacts in the isolators have proved their value in corrosive chemical environments and also in terms of their low maintenance, which results in significant cost reductions. The FRG isolators can be screwed / welded into the systems, regardless of position.

Upon request, the FRG can be equipped with an earthing contact, a temperature sensor, a pre-contact for residual current or electrical / mechanical locking.

As standard, the wiring of the auxiliary switch, the motor etc. takes place on a closed terminal box. Upon consultation, full in-house (local) control / remote control are available on a customised basis.

FLOHE DC SHORT CIRCUIT SWITCH / DC HIGH CURRENT ISOLATOR

THE VACUUM CONTACTS ARE INTEGRATED IN A SWITCHING FRAME (STEEL OR STAINLESS STEEL).

This results in short circuit devices with sizes ranges from 6-400 kA with switching voltages ranging from 5 V DC - 30 V DC.

In atmospheres where there is exposure to harsh chemicals, the vacuum contacts are protected against external aggressive influences and ensure a long maintenance-free service lifespan.

SWITCHGEARS FOR TRACTION

IN RAILWAY SYSTEMS CIRCUIT BREAKERS ARE REQUIRED TO ISOLATE AND EARTH CURRENTS. THESE CIRCUIT BREAKERS MUST CORRESPOND WITH THE TECHNICAL STANDARDS STATED IN **EN 50123-3** AS WELL AS **VDE 0115**.

The DC circuit breakers produced by FLOHE are capable of providing the specified on/off switching in both directions. This fulfils the requirements of excess voltage category 4 in accordance with EN 50124-1.

Pole distance	variable
Peak withstand current	50 up to 200 kA
Withstand current	20 up to 85 kA/1 s resp. 3 s
Making capacity	50 up to 180 kA
Motor drive	24, 48, 60, 110, 220, 230 V AC/DC
Manual drive	manual lever, towing eye
Pneumatic drive	5-6 bar
Locking magnet	24, 48, 60, 110, 220, 230 V AC/DC
Construction type	E0, E1, E2

CHANGEOVER CONNECTOR

GT 0,63-3,6-5P-U-man

TECHNICAL DATA

Standard units (optional data on request)

Nominal current	0.4 up to 12 kA
Nominal voltage	1.5 up to 40.5 kV
Number of poles	1 up to 12 poles
Pole distance	variable
Peak withstand current	50 up to 200 kA
Withstand current	20 up to 85 kA/1s resp. 3s
Motor drive	24, 48, 60, 110, 220, 230 V AC/DC
Manual drive	manual lever, towing eye
Pneumatic drive	5-6 bar
Locking magnet	24, 48, 60, 110, 220, 230 V AC/DC
Construction type	3 or more outgoing feeder

PRODUCT OVERVIEW ...

FOR OVER 60 YEARS:
**COMPETENCE IN ENGINEERING
+ MANUFACTURING**

...FROM THE INDIVIDUAL COMPONENT
TO THE COMPLEX HIGH-CURRENT SYSTEM

▶ EAF / LF / ESU

▶ SUPPORT ARM TECHNOLOGY /
HIGH-CURRENT LINES

▶ HIGH-CURRENT CABLES

▶ EXPANSION JOINTS

▶ ELEKTROLYSIS:
BUSBARS
